

TransFollow®

**Introduction to the TransFollow
product suite and solutions**

Unioncamere/Uniontrasporti
supply-demand meeting
March 25, 2025 at 3:00 PM

***Introduzione alla suite di prodotti e
soluzioni TransFollow***

**Uniting
Supply chains**

Supply chains are incredibly and increasingly fragmented. They tool and behave like stand alone dots, preventing the ecosystem from reaching its full potential and creating value.

Supply chains must work as united ecosystems and interoperability is key.

Agnostic, collaborative and inclusive, TransFollow DataHub bridges the gap by connecting all supply chains stakeholders' environments to make them interoperable and exchange data seamlessly and transparently.

TransFollow, Uniting Supply Chains.

Le supply chain sono incredibilmente e sempre più frammentate. Si comportano e lavorano come punti indipendenti, impedendo all'ecosistema di raggiungere il suo pieno potenziale e creare valore.

Le supply chain devono funzionare come ecosistemi uniti e l'interoperabilità è fondamentale.

Agnostico, collaborativo e inclusivo, TransFollow DataHub colma il divario collegando tutti gli ambienti degli stakeholder delle supply chain per renderli interoperabili e scambiare dati in modo fluido e trasparente.

TransFollow, unire le supply chain.

Connected today with many industry leaders, we are consistently building new partnerships across Europe and beyond to offer the easiest and the most interoperable ecosystem available in the market.

Grazie alla collaborazione con numerosi leader del settore, stiamo costantemente costruendo nuove partnership in tutta Europa e oltre, per offrire l'ecosistema più semplice e interoperabile disponibile sul mercato.

The TransFollow journey starts with the CMR: The Road Transport skeleton

Il viaggio di TransFollow inizia con la CMR:

La spina dorsale del trasporto su strada

Standard & Mandatory document governing road transport capturing **all information related to cargo and its journey.**

Regulates scope and responsibilities.

Shared amongst **all parties.**

Predominantly managed on **paper** making its use and administration inefficient

Documento standard e obbligatorio che disciplina il trasporto su strada e che contiene tutte le informazioni relative al carico e al suo viaggio.

Regola l'ambito e le responsabilità.

Condiviso tra tutte le parti.

Prevalentemente gestito su carta, rendendone inefficiente l'uso e l'amministrazione

The TransFollow journey starts with the CMR: The Road Transport skeleton

Il viaggio di TransFollow inizia con la CMR:

La spina dorsale del trasporto su strada

In 2008 an **additional protocol** had been established **providing a legal framework to digitalize CMR** consignment note, **e-CMR**, ratified by 38 countries so far.

TransFollow's e-CMR is considered the **leading standard in Europe**, developed for and by the market, thanks to its **early entry** and the **unmatched maturity** of its solutions through continuous evolution.

Nel 2008 è stato stabilito un protocollo aggiuntivo che fornisce un quadro legale per digitalizzare la lettera di vettura CMR, e-CMR, ratificato finora da 38 paesi.

L'e-CMR di TransFollow è considerato lo standard leader in Europa, sviluppato per e dal mercato, grazie al suo ingresso precoce e alla maturità senza pari delle sue soluzioni attraverso una continua evoluzione.

The TransFollow journey starts with the CMR: The Road Transport skeleton

Il viaggio di TransFollow inizia con la CMR:

La spina dorsale del trasporto su strada

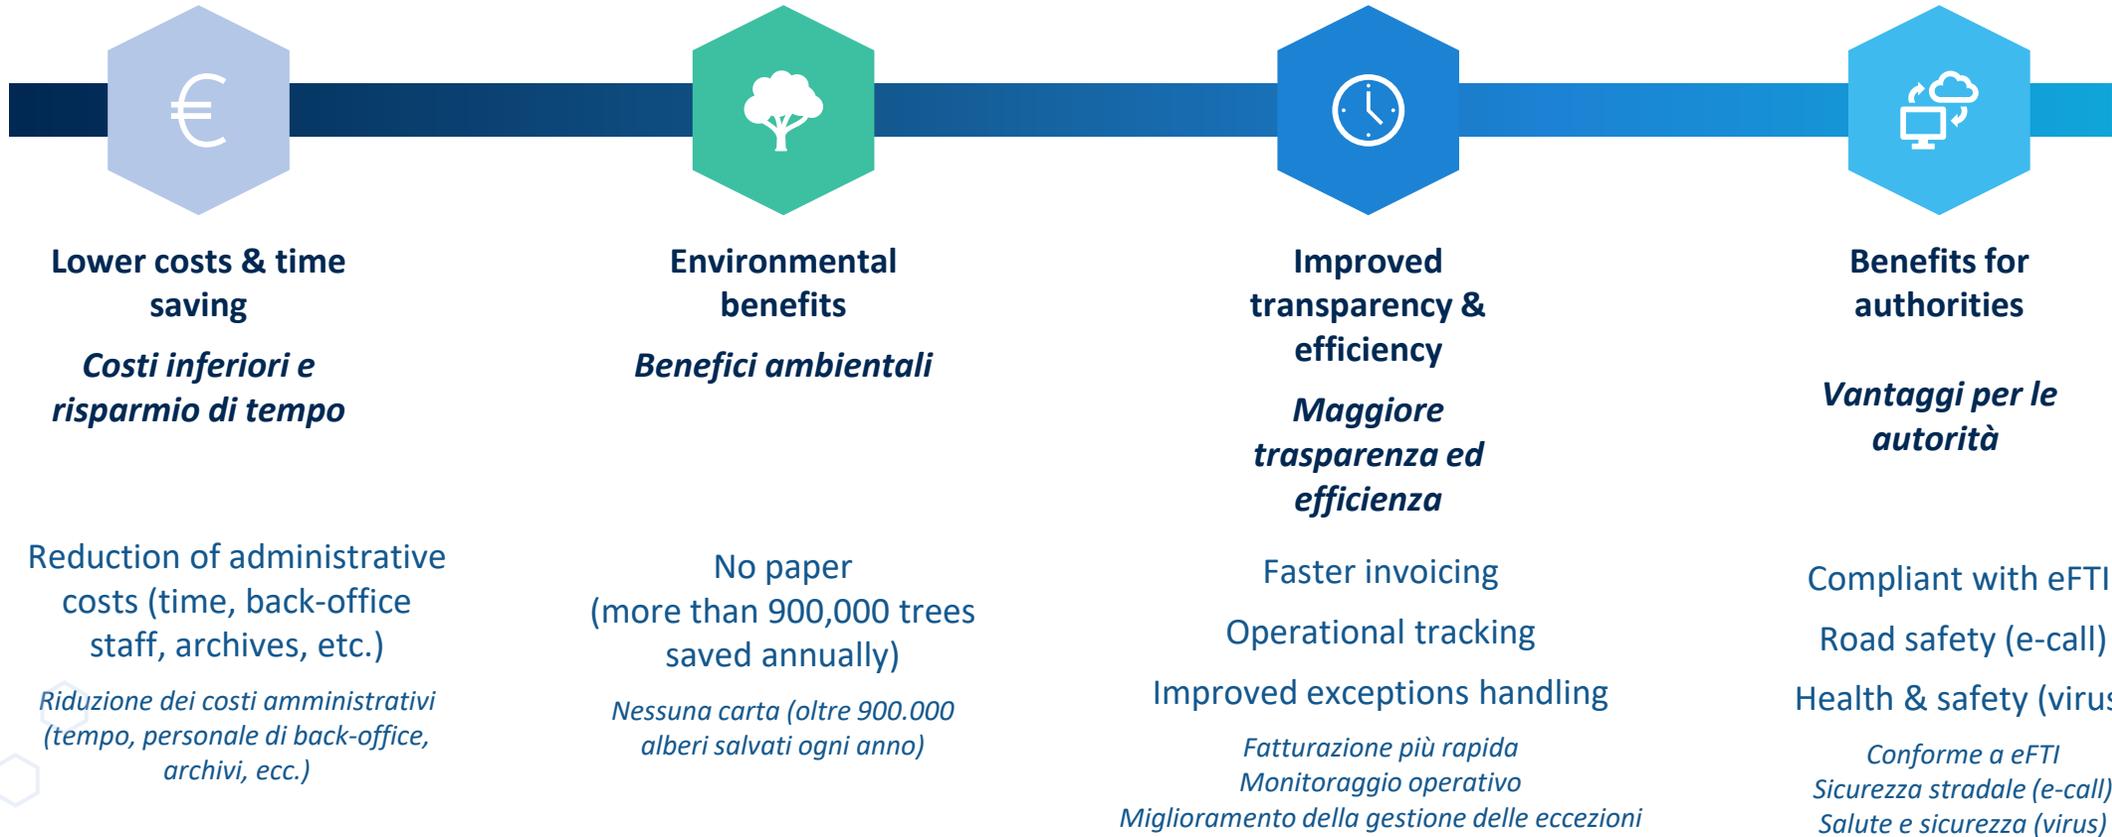

With the growing need for efficiencies and collaboration, the transition from paper based CMR to digital CMR will become a must for all supply chain stakeholders.

Con la crescente necessità di efficienza e collaborazione, il passaggio da una CMR cartacea a una CMR digitale diventerà un obbligo per tutti gli attori della supply chain.

E-CMR: huge benefits for logistics

enormi vantaggi per la logistica

Our core values

I nostri valori fondamentali

Visibility *Visibilità*

Gain real-time visibility for faster exception handling.
Otteni visibilità in tempo reale per una gestione più rapida delle eccezioni.

Simplicity *Semplicità*

Eliminate collaboration barriers inherent to a fragmented and heterogeneous environment
Elimina le barriere alla collaborazione inerenti a un ambiente frammentato ed eterogeneo

Efficiency *Efficienza*

Streamline operations to reduce administrative burdens and costs.
Semplifica le operazioni per ridurre gli oneri e i costi amministrativi.

Collaboration *Collaborazione*

Connect and exchange information with all your partners and customers.
Connettiti e scambia informazioni con tutti i tuoi partner e clienti.

Dematerialization *Dematerializzazione*

Digitize and manage the entire lifecycle of your freight documents.
Digitalizza e gestisci l'intero ciclo di vita dei tuoi documenti di trasporto.

Security *Sicurezza*

Ensure strict data security and privacy.
Garantisci la massima sicurezza e riservatezza dei dati.

Highest standards for data security, non-repudiation and digital signatures

Standard elevati per la sicurezza dei dati, non ripudio e firme digitali

3.2.b. Validation screens before signature: example of screens

3.2. TransFollow Drive

3. Setting up your account

Optional validation screen for validation of goods

Optional validation screen for arrival times

Optional vehicle validation screen

Optional validation screen for loading and delivery locations

Optional validation screen for data specific to your business

Signature Types: Sign with QR Code

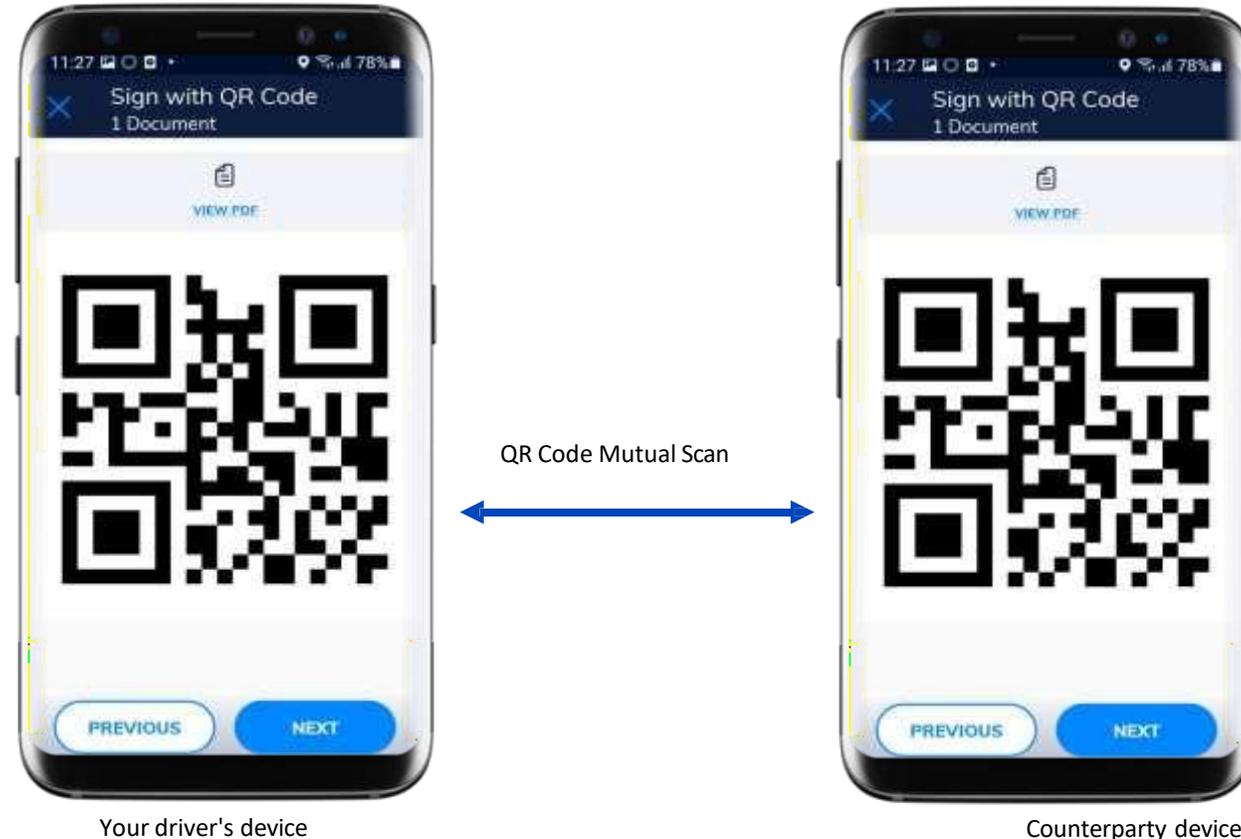

When your drivers perform the signature, screens driven by TransFollow Drive are displayed.

Here is an illustration of the signature based on QR codes between your driver and the counterpart running in the workflow mission of TransFollow Drive:

This signature method is a security-enhanced signature.

However, it does require the counterpart to have a TransFollow-enabled app so they can scan your driver's QR code and generate a QR code that your driver turns around.

This advanced signature makes it possible to identify the counterpart through several security elements.

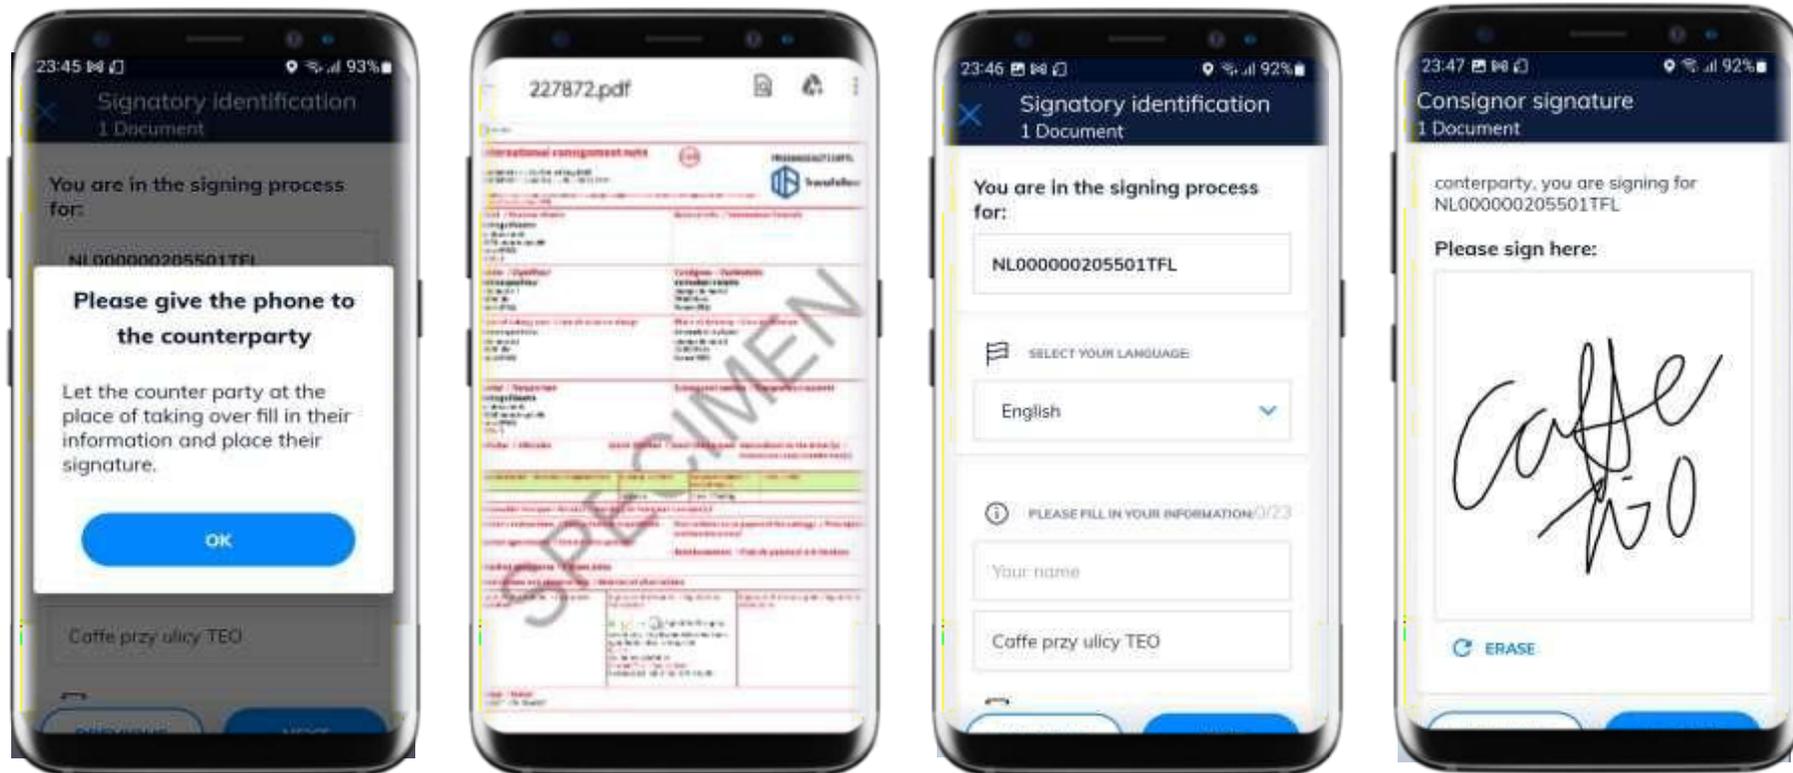

Note: when signing, the location of the signature is automatically captured.

Signature Types: Sign with Sign on Glass

When your drivers sign, screens driven by TransFollow Drive are displayed.

Here is an illustration of the signature on glass running in the workflow mission of TransFollowDrive:

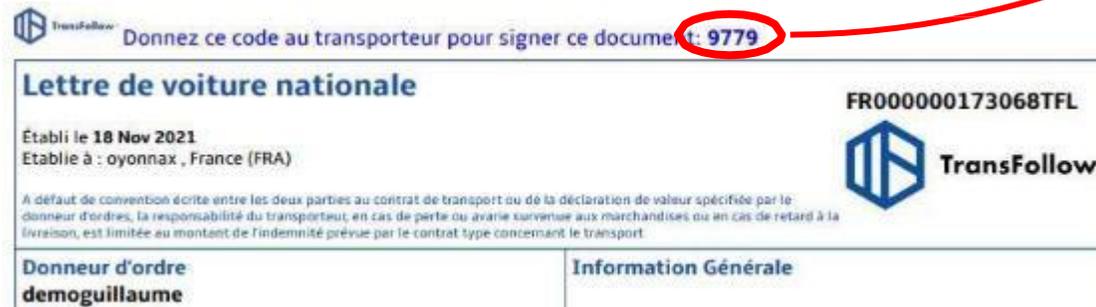

Note: when signing, the location of the signature is automatically captured.

Signature Types: Sign code via mail

With this type of signature, when signing the document, the driver provides an email address or a telephone number to the counterparty allowing them to maintain social distancing.

The counterparty then receives the consignment note. The consignment note contains a 4-digit code visible at the top of the document which he gives verbally to the driver (this code is not known to the other parties).

The driver enters the code on his on-board environment. TransFollow validates the code and saves the signature.

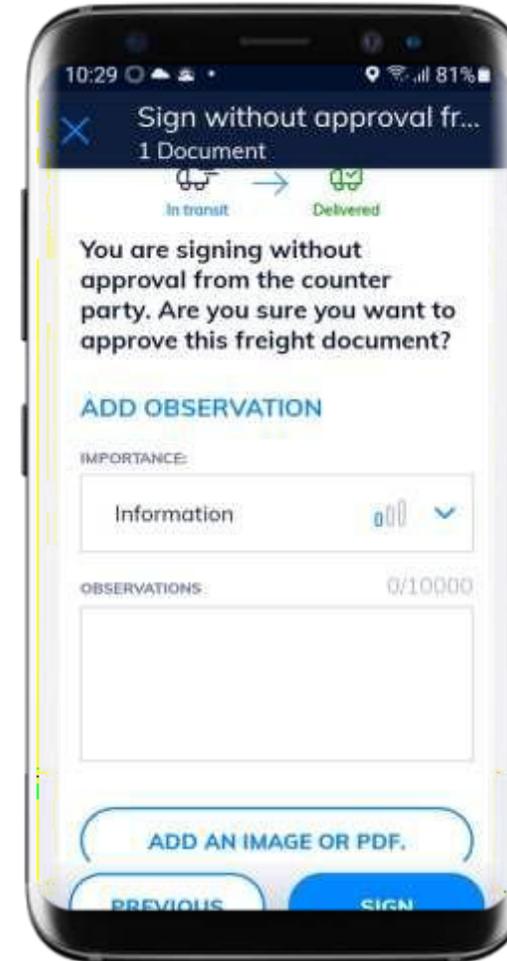

Signature Types: Sign alone

This (signature) is intended to respond to the operational case where no one is physically present to sign the document (on loading or on delivery)

In general, in this context, the customer will agree to use this type of signature depending on the operational context (night delivery for example)

The driver can then add, a photo of his delivery, and add a comment.

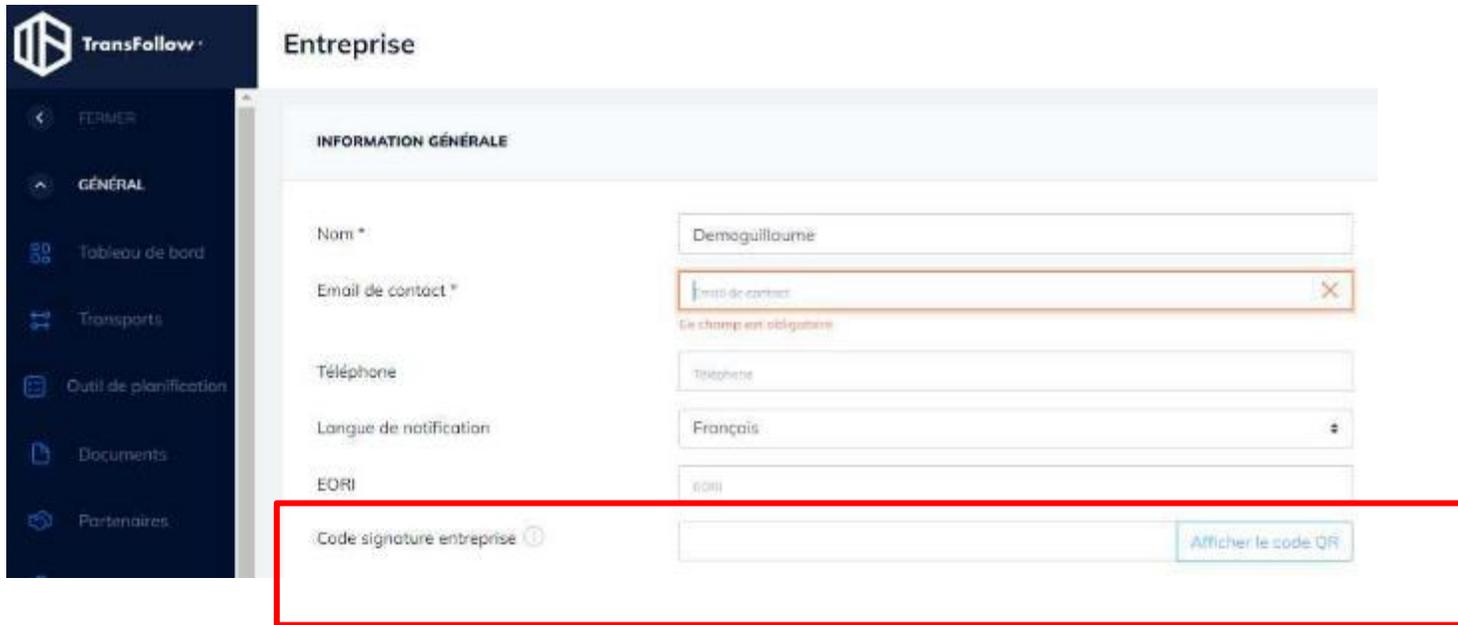

The GPS coordinates of the delivery point are captured.

Signature Types: Sign with company code

Here the signature by company code requires that the sending company is a QR code registered in the TransFollow platform.

The driver will scan the QR code shown by the shipper to the carrier to identify the company

The screenshot shows the 'Entreprise' profile page in the TransFollow application. The page is titled 'Entreprise' and contains a form for 'INFORMATION GÉNÉRALE'. The form fields are:

- Nom *: Demoguiloumé
- Email de contact *: [Placeholder] (This field is highlighted with a red border and has a red error message below it: 'Ce champ est obligatoire'.)
- Téléphone: [Placeholder]
- Langue de notification: Français
- EORI: [Placeholder]
- Code signature entreprise ⓘ (This field is highlighted with a red box)

There is a button labeled 'Afficher le code QR' next to the 'Code signature entreprise' field.
